

The ultimate decision of how big the flag can be is derived by the flagpole / structure the flag is to be flown from. Your flag needs to be clear of any obstructions to prevent damage to it. Flags too big for their flagpoles can result in the damage to your flagpole, whilst the flag needs to be big enough to be seen ie from the roof of a building.
To check the maximum recommended flag size for your pole, please refer to the specifications on the flagpole information sheets.

## BURGEES, BUNTING \& HANDWAVERS

Our standard sizes for burgees and smaller yachting flags are:
$30 \mathrm{~cm} \times 20 \mathrm{~cm}\left(12^{\prime \prime} \times 8\right.$ ") $/ 38 \mathrm{~cm} \times 25 \mathrm{~cm}\left(15^{\prime \prime} \times 10^{\prime \prime}\right) / 45 \mathrm{~cm} \times 30 \mathrm{~cm}\left(18^{\prime \prime} \times 12^{\prime \prime}\right)$
Bunting pennants are normally $30 \mathrm{~cm} \times 20 \mathrm{~cm}$, these can be triangular or rectangular
Handwavers range from the smallest at $30 \mathrm{~cm} \times 20 \mathrm{~cm}\left(12^{\prime \prime} \times 8\right.$ ") for small plastic sticks, up to $45 \mathrm{~cm} \times$ $30 \mathrm{~cm}\left(18^{\prime \prime} \times 12^{\prime \prime}\right), 90 \mathrm{~cm} \times 60 \mathrm{~cm}\left(36 " \times 24^{\prime \prime}\right)$ and $120 \mathrm{~cm} \times 90 \mathrm{~cm}\left(48^{\prime \prime} \times 36\right.$ ") for sports event handwaver flags on wooden sticks.

## NATIONAL FLAGS

Most National flags are restricted to certain proportions, they are usually available in $2: 1$ or 3:2 ratio. If you wish your corporate flags to match any national flag you fly, this needs to be taken into consideration. The most common sizes are highlighted in green on the table below.

## CUSTOM FLAGS

See the table below for the most common size and the appropriate area
