

# FORECOURT POLE

The Forecourt Pole is a single section pole, made from 2mm thick 6082 T6 tempered aluminium. It has been designed with strength in mind for continual use outside on a forecourt. There are no joints in the pole avoiding weak point where a pole can bend. This pole provides a very economic option for large scale displays.

Available in two lengths, they can be powder coated in black or white as standard but custom colours are available for a minimum order quantity.

The Forecourt Pole is standardly supplied with a freely rotating 1m arm with joint and weight. If you wish to fly flags without an arm a cleat and halyard kit is available. These poles can be installed onto various mounts as shown below.

## Base Options

Car Wedge

Ground Socket

D-Barrier Clamps

Wall Mounted Socket

# HD FEATHER POLE

The HD feather Pole is a single section pole, made from 2mm thick 6082 T6 tempered aluminium. It has been designed with strength in mind for continual use outside on a forecourt unlike it's portable equivalent. There are no joints in the pole avoiding a weak point where a pole can bend. This pole provides a stunning vista in large scale displays.

Available in two lengths, they can be powder coated in black or white as standard but custom colours are available for a minimum order quantity.

The rotating arm displays flags 80cm wide and up to 420cm long. Due to it's added strength the HD Feather Pole can display double sided flags up to 320cm long.

These poles can be installed onto various mounts as shown below.

# FLAGTRAX

Flagtrax is a new and unique product which enables you to change flags from ground / lower levels quickly and easily, avoiding the use of lifts / cherry pickers and Road traffic management plans. The system comprises of a steel arm at the top, curved aluminium track and a push / pull raising and lowering mechanism. The unit can display flags up to 140cm wide and 400cm deep subject to the substrate you are fixing onto. Ideal for fixing onto existing lampposts, columns or walls, flagtrax offers a simplistic branding solution. When mounted centrally on a column two systems can be mounted together so that the display can be oriented in both directions to meet the footfall.

## SPECIFICATIONS

Arm Length	85cm
Arm Weight	4kg
Track Length (Standard)	4.34m
Height of track bottom from ground level	170cm
Min Column diameter*	218cm
Standard flag sizes*:	10cm
	76cm x 140cm
	76cm x 270cm
	76cm x 200cm

\*Custom sizes are available

## BANNER MAST

The Banner Mast is produced from 3.2mm thickness engineering grade 6082 aluminium alloy, it is installed into a 1m long, PVC-U ground socket for extra stability and strength, the mast is bolted into the socket to prevent rotation and movement.

Standardly the pole comes in grey, other colours are available, minimum qty applies.

Strong high grade black fibreglass arms, designed to flex in the wind. Powder coated aluminium brackets come in black, silver or white. The integrated spring loaded tensioning mechanism works with the arms to resist the wind loading on the banners. Each mast can accommodate up to two banners per column.

# BANNERS

The PVC banner is the preferred option for External Banners as they provide longevity and high quality graphics to withstand the good old British weather at any outdoor event.

Fabric banners are becoming more popular as they are far easier to transport and store with the added bonus of being able to throw them in a washing machine if required. These can be produced in Polyester mesh, knitted polyester or heavy polyester all lightweight in comparison to PVC

## EVENT BARRIER

The Event Barrier is a premium barrier system, Its advantage is the variations of configurations into which they can be displayed..

They are strong yet lightweight, constructed from black powder coated aluminium tubing. The frames are adjustable creating the perfect tension to your banner. The system can display single or double sided banners in various substrates. Additional systems can be added at a later date if required. The units are easy to assemble with only one person required. The barriers are mounted onto strong rotationally moulded plastic bases, these are filled with water / sand and can be used on any surface, indoor or outdoor\*
