MOUNT OPTIONS

ZEPHYR
WE MAKE YOUR BRAND FLY

For use with a Forecourt, HD Feather or Vision Pole

CAR WEDGE

Our strong and sturdy Wedge can be used in conjunction with any vehicle. The Wedge enables you to display a flag wherever you can park a car. It is simple to use providing a sturdy but temporary position for your flagpole. The spigot extends well into the pole providing a safe and stable display with no nuts and bolts around to damage the vehicle.

Our Wedge is constructed from 5mm steel, zinc coated to give a strong and professional finish to your display

SPECIFICATIONS

Length	405mm
Width	316mm
Overall Height	239mm
Height Of Spigot	200mm
Internal Diameter Of Spigot	28mm
External Diameter Of Spigot	40mm
Weight	6kg

GROUND SOCKET

The Ground Socket is to be used for permanent displays. The socket is concreted into the ground, providing a secure 'glove' for the pole to sit in, thus increasing the safety and longevity of the pole preventing any damage to the base of the pole whilst keeping the pole vertical.

SPECIFICATIONS

Ground Socket Internal Dia	46.5mm
Ground Socket External Dia	53.5mm
Length Of Ground Socket	600mm
Weight	300g
Foundation Depth*	580mm
Foundation Square*	500mm

These are suggested dimensions only, actual measurements will depend on ground conditions

EVENT BASEPLATE

This clever Event Baseplate has been designed for use on grass or soft areas. It is easy to use with no specialist equipment required. The Event Baseplate provides a strong and secure base yet is easy to remove, once removed, there are no large holes left in the ground and the unit can be used again and again. Because there is no need for foundations, there is no concrete required thus making this a very economic and environmentally friendly option for soft ground.

Templates are available to help positioning multi-pole installations.

SPECIFICATIONS

Pole Height	4m /4.8m	5m/5.8m
Anchor Length	440mm	500mm
Anchor Diameter	30mm	40mm
Anchor Head Size	17mm	22mm
Anchor Bolt Size	M10	M12
Baseplate 'Footprint Diameter'	270mm	270mm
Baseplate Depth	5mm	5mm
Spigot Length	24mm	24mm
Spigot External Diameter	40mm	40mm
Overall Baseplate Height	25mm	25mm
Total Weight (3 anchors & 1 baseplate)	3.7kg	6kg

D-BARRIER CLAMP

These clever Clamps have been specifically designed to be used on the D-barriers found around many sites. They enable you to make use of these existing structures providing permanent fixtures without the need for ground excavations. Easy to use and aesthetically pleasing look, they provide increased on-site safety due to the strength of the steel brackets. They are used in conjunction with a ground socket which prevents damage to your flagpole.

You will need to know the diameter of your D-Barrier to order the correct gauge clamp. We stock the standard size of 76mm diameter, if the upright of your barrier or structure is wider than this, please contact our sales office who will be able to assist you with other non stock sizes.

SPECIFICATIONS

Ground Socket Internal Dia	46.5mm
Ground Socket External Dia	53.5mm
Length Of Ground Socket	600mm
Clamp Dimensions	198x100x20mm
Small Hole Diameter	55mm
Large Hole Diameter	77mm
Total Weight Of Kit (2 clamps & ground socket)	3.38kg

WALL MOUNTED SOCKET

The wall mounted socket can be used on most walls or fences, again it is making the most of existing structures, ideal for situations where digging foundations or using a ground level base solution is not option. Prior to installing any wall mounted flagstaff, we recommend that you seek advice regarding the suitability of where you intend in install and also the structural soundness of the surface in question. If you are installing a pole with a rotating arm, there must be adequate room for the arm to rotate freely without hitting any obstacles. The brackets are supplied without any bolts, these will dependant on the structure the brackets are being installed on. The kit comes complete with a ground socket into which the pole is inserted, this prevents damage to your pole.

SPECIFICATIONS

Ground Socket Internal Dia	46.5mm
Ground Socket External Dia	53.5mm
Length Of Ground Socket	600mm
Weight	300g
Bracket Plate Size	200mm x 100mm
Bracket Internal Diameter	55mm
Bolt Hole Diameter	14mm
Distance Between Top And Bottom Bracket (centre of hole to hole)	590mm
Total Weight Of Kit	4.43kg

EVENT WATERBASE

The Event Waterbase can be used on any level surface. The robust waterbases are easy to transport and can be filled up on site with water. Once stacked and secured together, the spigot can be positioned down the central hole providing a strong and sturdy insert for your pole to sit on. There is an option for a cover which sits over the stack of bases providing a more aesthetic look these can be plain or custom printed with your branding, making it the ideal solution for your event.

SPECIFICATIONS

Waterbase Size	60cm x 60cm x 13cm
Waterbase Weight (empty)	4kg
Waterbase Weight (full)	40kg
Length Of Spigot	100cm
Diameter Of Spigot	40mm
Wall Width Of Spigot	3mm
Weight Of Spigot	1kg
Weight Of Complete Unit (3 bases + spigot) (empty)	13kg
Weight Of Complete Unit (3 bases + spigot) (full)	121kg

GROUND MOUNTS

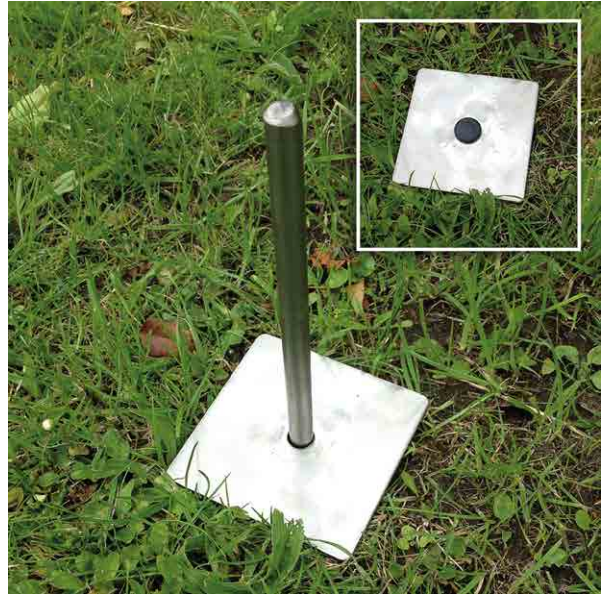

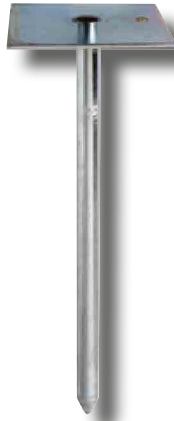

EURO
RANGE

IN-GROUND MOUNT

This stainless steel mount can be pressed permanently into lawns or concreted into place.

When not in use simply remove the spigot and fit the rubber plug to keep out dirt.

As the top plate is flush with surface there is no restriction to pedestrians or lawn mowing.

SPECIFICATIONS

Size: 300mm x 100mm x 100mm

Weight (each): 0.65kg

Construction materials:
Stainless Steel

GROUND STAKE

Economical and portable, this zinc plated steel mounting will provide sturdy support in most ground conditions.

It can be tapped into the ground with a hammer or mallet and is easy to remove.

Ensure the stake is vertical and push firmly into the ground. Tap the top of the angled steel section with a mallet until at least 70% has gone into the ground. Do not hammer the 12mm spigot. Fit the pole over the spigot.

SPECIFICATIONS

Size: 620mm x 70mm x 25mm

Weight (each): 0.65kg

Construction materials:
Zinc Plated Steel

OTHER MOUNTS & ACCESSORIES

ANGLED FIXED MOUNT

This 30° angled zinc plated steel mount is designed for use on walls, fences or platforms. It allows the pole to rotate freely in the wind, and to be easily displayed or removed as required. Attach with bolts and or screws* as appropriate. 'U' bolts can be used for fixing to poles or fence posts up to 55mm diameter. *not supplied

SPECIFICATIONS

Size: 260 x 100 x 150mm

Weight each: 0.65kg

Construction materials:
Zinc Plated Steel

Angle: 30°

Mounting design may vary slightly from illustration.

VERTICAL FIXED MOUNT

The vertical zinc plated steel mount is designed for use on walls, fences or platforms. It allows the pole to rotate freely in the wind, and to be easily displayed or removed as required. Attach with bolts and or screws* as appropriate. 'U' bolts can be used for fixing to poles or fence posts up to 55mm diameter. *not supplied

SPECIFICATIONS

Size: 290 x 100 x 60mm

Weight each: 0.65kg

Construction materials:
Zinc Plated Steel

Angle: 90°

Mounting design may vary slightly from illustration.

JOCKEY WHEEL ADAPTOR

The jockey wheel adaptor has been especially designed for displaying the Euro poles on a caravan jockey wheel.

The spigot which goes into the jockey wheel is 42mm in diameter. Perfect for instant displays at Caravan Parks.

SPECIFICATIONS

Size: 260 x 50 x 50mm

Weight each: 0.65kg

Construction materials:
Plastic
Zinc Plated Steel

Mounting design may vary slightly from illustration.

CARRY BAGS

A carry will make transporting your display safe and convenient and will ensure your display always arrives at it's destination looking its best.

Pole Carrying Bag (Green)

A robust slim carry bag designed to fit the pole, flag/ banner and ground stake mounting option.

Vega/Nova Carrying Bag (Green)

A robust carrying bag designed to carry the vega/nova base.

SPECIFICATIONS

Vega Bag Size: 530 x 560mm

Nova Bag Size: 720 x 720mm

PRINTED FLAGS

ZEPHYR
WE MAKE YOUR BRAND FLY

Here at Zephyr we utilise both Silk screen and Digital printing onto a variety of polyester and coated substrates. Currently screen printing is still the most cost effective process for large quantities, it produces strong vibrant colours and can produce designs in both line colour or 4 colour process or a combination of both. The resulting printed flag is suitable for exterior and interior use being both waterproof with a good light fastness, and lightweight which means that larger flags can be flown for instance where the heavier applied version cannot.

For shorter runs and more complex 4 colour process designs, digital printing is the most suitable method. This method allows for a faster turn around since it is a more simplified process.

Printed flags are available as single or double sided, we can also print badges which in turn can be applied onto a flag. From large flags, shaped flags to small pennants and burgees we can meet your demand and quality expectations.

Our most common substrate is knitted zephpol, (knitted polyester 110g) usually printed as a single thickness flag, reading correctly from one side and mirror image on the reverse.

Flags are available as double sided with an interliner, this option is only suitable for portrait designs with an arm, for double sided landscape flags, we recommend using our black backed material, these though cannot be rewashed unlike many of our other substrates, the double sided flags are heavier and this will need to be taken into consideration when being flown.

We are constantly asked for harder wearing flags, flags that remain intact for much longer avoiding expensive site visits to change flags and environmentally friendly by printing less flags.

Our solution is our Zephpol IEP (Intelligent Engineered Polyester) a breakthrough against natural wear and tear, engineered cloth that protects against the elements. Single thickness 155g flags printed from each side to give enhanced graphic reading correctly from one side and mirror image on the reverse. There is of course an initial high outlay for flags of such quality and longevity but recouped handsomely over their lifetime. We have a growing number of testimonials from house builders and developers championing the product.

For further information on the choices of cloth, please refer to the enclosed list.

APPLIQUED FLAGS

ZEPHYR
WE MAKE YOUR BRAND FLY

Appliqued flags are the original and traditional form of manufacturing flags and banners, it involves layering different coloured knitted fabrics on top of each other, machining round and cutting away the piece of the cloth that is not required, the 'negative' of the image.

This method uses a specific colour range of knitted polyester, the material being applied on and the flag's woven base material, this means that there are limitations on colour and pantone references cannot be matched, we can provide colour swatches on request of our cloth's colour range so that nearest matches can be chosen.

This is a time consuming method from creating suitable artwork, plotting the design onto the relevant coloured material, machining each colour and then cutting away the 'negative' part of the design, thus it's also an expensive option of manufacture.

The end result is a quality crafted sewn flag. For a completely appliqued flag, the best results are achieved with simplified designs, if your logo is more complex there is the option of digitally printing the logo as a badge and applying this onto the woven cloth ground. Appliqued flags are available as a single or double sided flag and can be finished in various ways ready for hoisting.
